

SteerCo Charter (Template)

Step 5 · Experimentation

Agenda, attendance, red/yellow/green norms, decision log, and escalation rules for running the steering committee, set once at the start, so the group isn't renegotiating how it operates every week. Blank template; see the companion example for a completed version and a real decision log entry.

How to use this

Fill this in and agree it with your sponsor before Sprint 1, not during it. A real decision log entry names the actual number, the actual issue, the actual decision, "status update" and "open discussion" are not decisions.

The charter

Attendance	[Who is standing/required, who joins later and when]
Cadence	[How long, how often, what counts as a valid cancellation]
RAG norms	[What red/amber/green mean for your criteria, and what the group does when a meeting is all-green]
Agenda structure	[Your standing agenda, in order, with time allocations]
Escalation rule	[How long a blocker can sit before it goes to the sponsor by name]
Decision log	[Where decisions get recorded, and what fields each entry needs]

Decision log entry template

Demo	[What was shown, and what it proved]
Metrics	[RAG status against your Day 90 (or equivalent) criteria]
Blocker	[The specific blocker, named, not a category]
Decision	[What was approved, the owner, and the date]
